1. Introduction

Holixa PlusPack 4 AutoCAD contains extra functionalities in AutoCAD with a focus on automating certain repetitive tasks and ease of use. These functionalities were chosen by our staff based on FAQ's from our Service Desk customers. If you have remarks or requests about this topic please don't hesitate to contact our Service Desk at support.bnl@arkance-systems.com.

1.1. General note

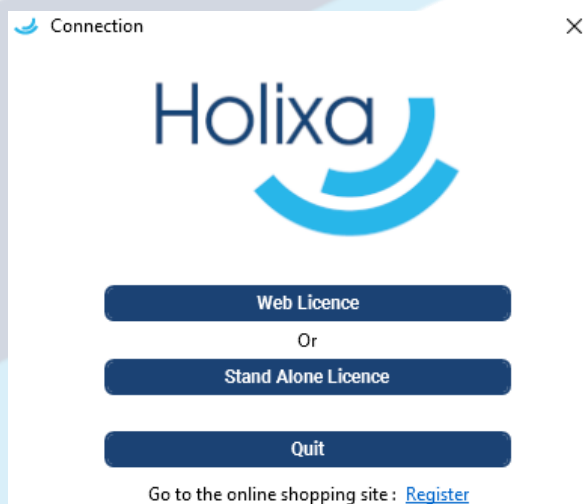

A windows popup may appear, simply click 'more info' and then 'run anyway'.

2. License, registration and activation

2.1. License type

There are two different types available in function of the type of the Holixa PlusPack 4 AutoCAD:

Web Licence

Registration for all computers within the same AD (active directory) domain

Standalone License

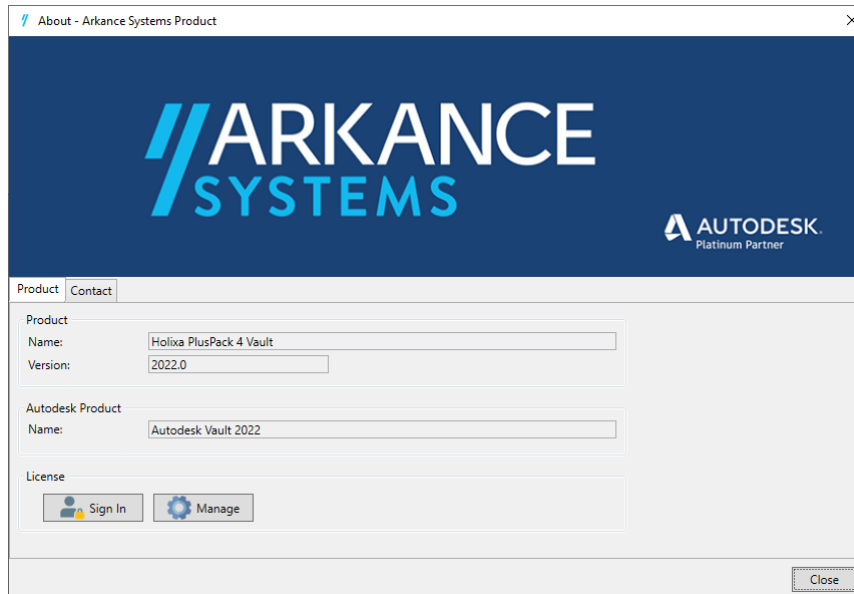

Registration per computer (limited to one computer)

NOT RECOMMENDED

Contact our helpdesk for more information: support.bnl@arkance-systems.com

2.2. Registration and activation

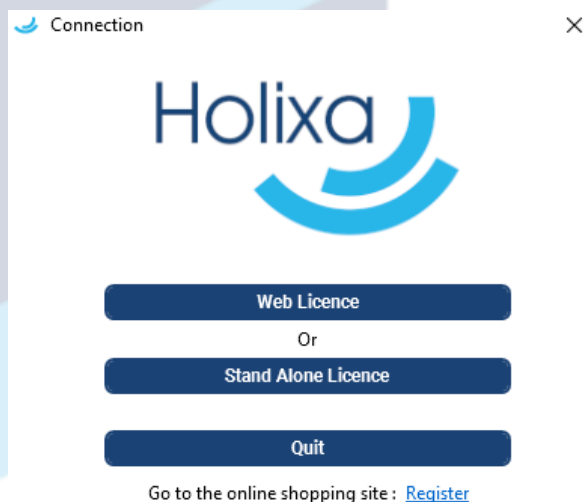

Click **Sign In**

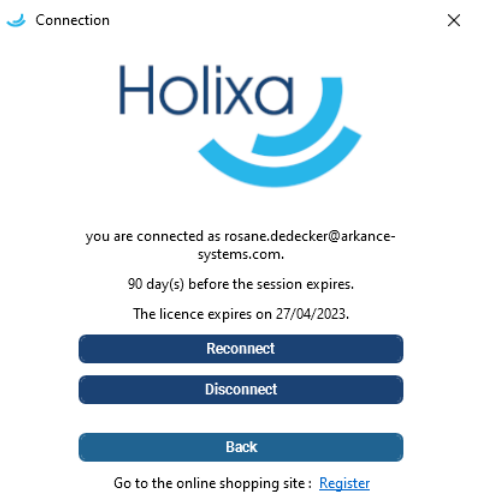

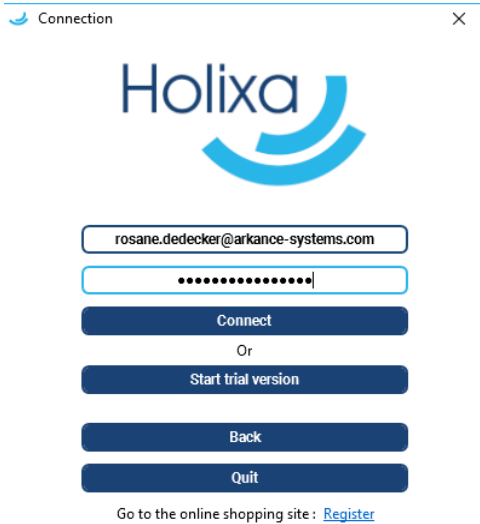

The first time you have to “register”, unless you have already received an email from holixa-license@arkance-systems.com to make a new account. Then you can follow the instructions in the mail.

After registration, you can Connect with your e-mail address and your password.

Choose ‘**Web License**’ as your license type:

3. Features

3.1. Property Editor/Options

This tool is designed to let you add the desired properties in your drawings. These properties can then be used in fields and attributes.

1. use the input fields to place text

Property name:

Label:

Type:

Default value:

2. two options for type: fixed value or selection field

Type:

Type:

Items:

Default value:

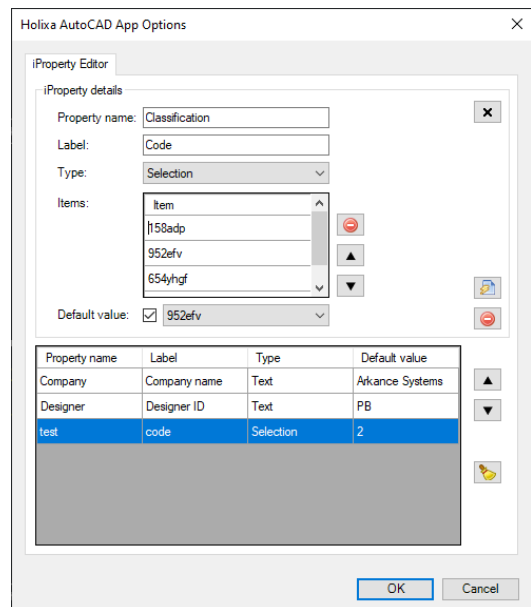

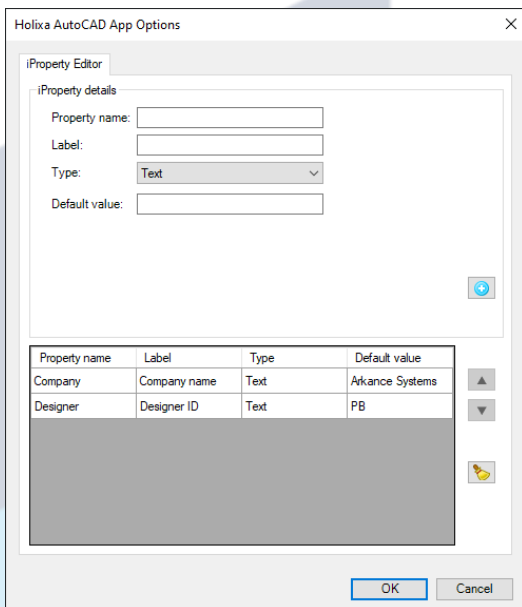

3. Click 'New iProperty' to confirm

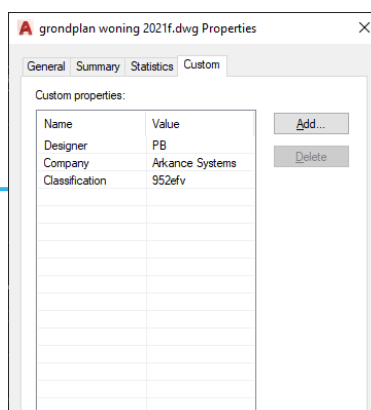

4. Use arrows to arrange the properties

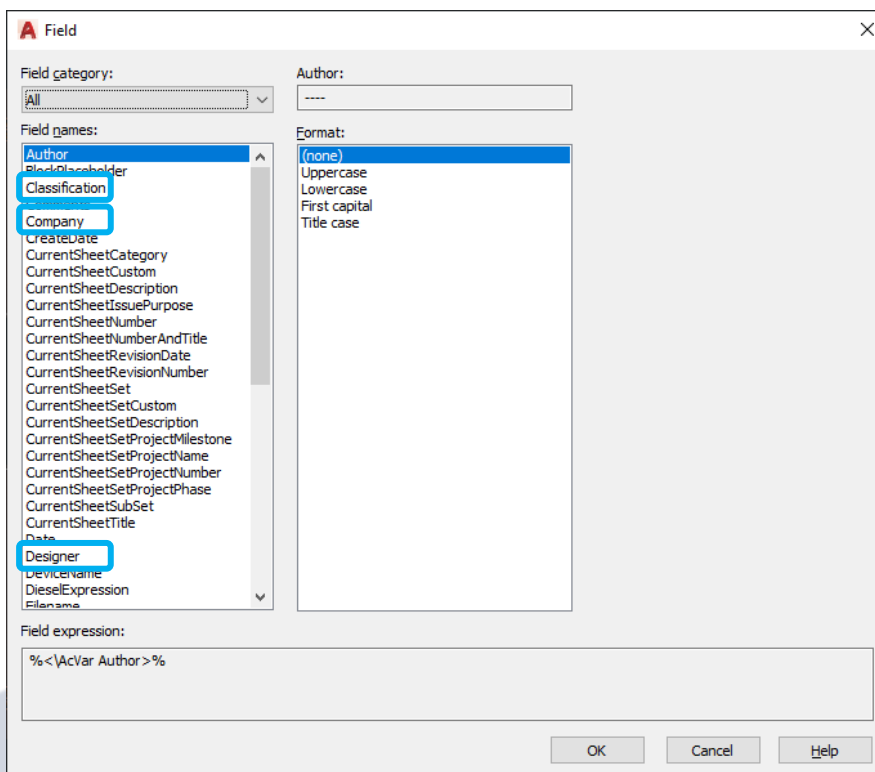

5. Use the brush to delete all properties at once

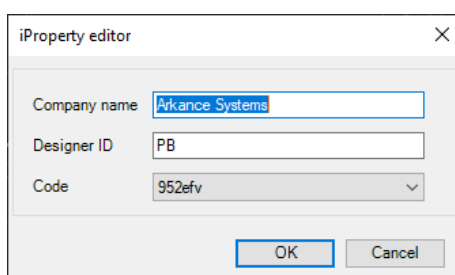

After clicking on the 'OK', the properties are added to the drawing properties of the DWG.

The custom made iProperties are available in the Field command.

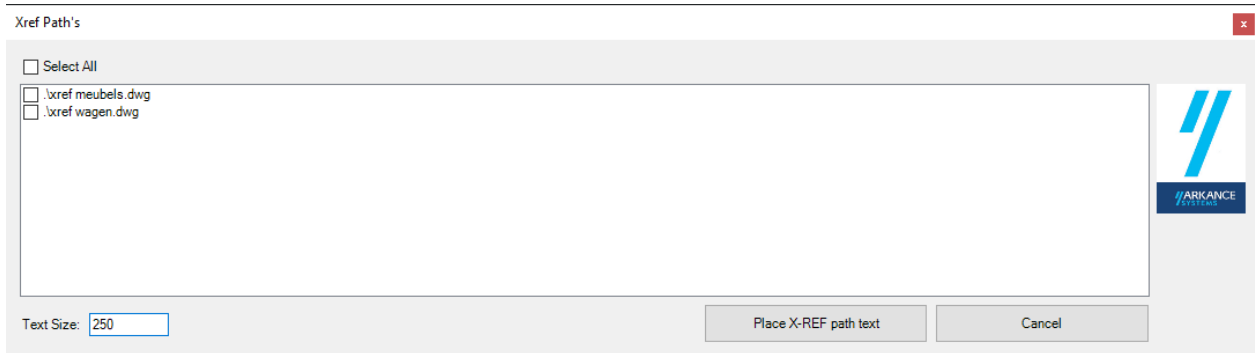

The value of the iProperties can be easily modified through the 'Property Editor'

3.2. Xref Path Placer

This functionality lets you add all or some of your Xrefs as Mtext for a visual check when plotting.

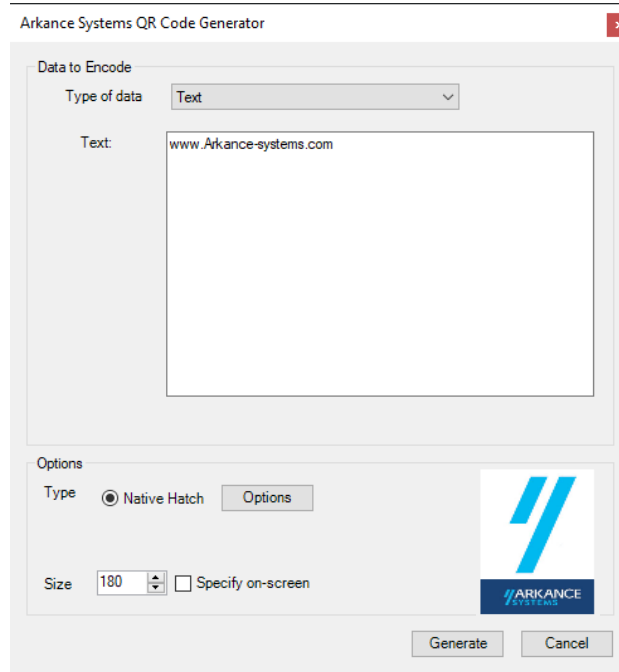

Looks like this in the AutoCAD drawing.

3.3. QR Code

This tool generates a QR code which you can add to the drawing.

Simply add the desired text, URL, ... in the 'textbox' and click generate to place the QR-code in the drawing.

4. Contact Arkance Systems service desk

With these buttons you can contact the Arkance Systems Service Desk consultant directly by email without the need to switch to another program (Outlook, Lotus Notes, ...). You can also ask for remote support and send large datasets via the free WeTransfer service. Via the Help button, you open this document.
